

Recent advances in cellulose nanotechnology research

Production, characterization and applications

Invitation

RISE PFI has the pleasure to organize the conference **Recent advances in cellulose nanotechnology research** in Trondheim, Norway 05 - 06 October 2022. This is the 8th seminar in a successful series of biannual meetings held since 2006.

Nanocelluloses have significant commercial potential for a wide range of applications. Since the first conference in this series was held, utilization of nanocelluloses have developed from being solely a research topic to be used in commercially available products. The conference focuses on production, characterization and applications of cellulose nanofibrils and nanocrystals. The attendees will be offered a unique platform for new insight into the latest developments in cellulose nanotechnology research, as well as an opportunity to exchange knowledge and ideas.

Early-bird registration fee: 7000 NOK. Deadline 1 September 2022 (includes lunch both days and conference dinner 05 October). Late registration fee: 8000 NOK.

Register online: Please give us the names, telephone numbers and e-mail addresses of those who will participate.

[Register here](#)

Call for posters: Authors should submit a maximum one page abstract of their posters. Submit your poster to firmapost@rise-pfi.no, using “**Nanocellulose poster**” in the subject field. Deadline: 1 September 2022.

Confirmed speakers

Akira Isogai
University of Tokyo

Stephen Eichhorn
University of Bristol

Alain Dufresne
Grenoble Institute of Technology

Alfred French
U.S. Department of Agriculture: New Orleans

Heli Kangas
VTT

Lars Berglund
KTH

Gary Chinga Carrasco
RISE PFI

Kristin Syverud
